

COLOUR	ECO
MATERIAL	Wood Plastic Composite
HAIR DYE	5/0 N Brown. 20 Vol Developer, BRAND: Paul Mitchell

RESULTS

All surfaces were cleaned via our recommended cleaning procedure.

Each stage was wiped with a damp cloth using lukewarm water.

Final Result: After 24 hours, all traces were cleaned using a mild alkaline soap and lukewarm water. The surface was then wiped with a clean cloth with fresh water. Each surface was then dried with a dry, clean cloth.

Removing difficult stains such as professional hair colour or bleach is recommended that it is cleaned immediately.

Hair colour & bleach reacts to all surfaces the same as it does to hair. If hair colour is able to develop & penetrate the surface of the material, it may be impossible to remove. Treat all stains promptly as per our Cleaning instructions.
